

Description

CAN bus transmitter is designed to solve the problem of transmission distance of CAN bus. Generally speaking, a CAN bus transmitter is connected every 400 meters (baud rate: 25kbps), which can extend the distance of communication lines to facilitate users long-distance wiring.

Technical Specification

Module No.	AW-D122
Input Voltage	18VDC~28VDC
Working Current	≤100mA
Working Environment	-10℃~50℃
Protection Level	IP30
Product Size	110mm (L) *87mm (W) *9mm (H)
