

Description

The AW-AW-FP200LC is a 1-8 loop card that works with the AW-FP200 fire alarm control panel. AW-FP200LC can be powered by AW-FP200 directly or by an external power supply. AW-FP200LC is designed with qualities of simple installation and easy maintenance.

Dimensions

Technical Specification

Operating voltage	20~24VDC
Addresses per loop	250
Load current	Max 3A
Type	Class A
Recommended type of loop cable	Unscreened twisted-pair, 1.5mm ²
Loop transmission distance	≤2000m
Compatible panel	AW-FP200 series
dimensions	158.7×84×20mm
Operating condition	Temperature range: -10°C~50°C; Max relative humidity: 95%, no condensation
